

iNCLUSABLE

Events for **everybody**.

Every week, residents miss community events — **not because they aren't interested, but because they can't find out whether they'll be able to get in.**

Inclusable fixes that. An **event discovery app** built with accessibility at its core, shaped by real experience and powered by AI — making your council's events visible, inclusive and trusted.

Free council events pay no fees at all.

LIVE ON INCLUSABLE

Access details, before residents book.

Every listing shows venue access details where available — step-free entry, accessible toilets, seating, quiet areas and transport — including an accessibility score out of 100, so residents can plan calmly and take part.

iNCLUSABLE

Why councils choose Includable.

Because inclusion isn't just the right thing to do — it's good for everyone. Listing your council's events makes accessibility visible, builds trust and connects you with residents who want to take part.

Reach a wider audience

Your events become discoverable to residents actively searching for accessible experiences.

Build trust & reputation

Published access detail shows you have thought about the whole community, not just most of it.

Save time & simplify access

Enter information once. Includable distributes it through badges and filters, cutting repeat enquiries.

Demonstrate leadership

Measurable commitment to inclusion — evidence for councillors, funders and your access and inclusion reporting.

Free events pay no fees at all.

No listing fee, no ticketing fee, no processing fee — most council events cost nothing to publish.

iNCLUSABLE

**Strengthen community inclusion.
Improve transparency.
Deliver measurable impact.**

1

Demonstrate community leadership

Visible accessibility information aligns with your access and inclusion plan and broader council strategies.

2

Provide measurable inclusion metrics

Track listing activity, visibility, categories and engagement to report progress to stakeholders and government.

3

Support local venues & organisers

Give your community an easy way to publish consistent accessibility details using AI-guided checklists.

4

Reduce complaints & service load

Clear, centralised accessibility information means fewer calls, emails and escalations.

5

Showcase your region as inclusive

Promote festivals, precincts, parks and facilities with trusted accessibility profiles.

42,000+ venues with accessibility information · 1,500+ events · 500+ destinations — event discovery, venue information and ticketing in one platform.

iNCLUSABLE

THE PROBLEM

Inclusion goals are easy to set and hard to measure.

Access and inclusion planning is standard practice for councils Australia-wide — DIAPs in NSW, DAIPs in WA and SA, equivalents elsewhere. But most have no current, searchable dataset of accessible venues to plan or report against. Auditing every location is expensive and dates quickly, and without baseline data it's hard to show progress or find the gaps. Meanwhile residents call venues one by one, or guess.

WHAT COUNCIL GETS

Practical accessibility intelligence for your LGA.

A searchable map for your residents

Residents search by postcode and see accessible venues near them with practical detail — wheelchair access, accessible toilets, parking, quiet spaces — shown where available.

A baseline you can report against

Track a local accessibility baseline over time — how many accessible venues exist, and which features are most common. Supports your access and inclusion plan reporting; it does not replace certified audits.

Council-verified trust layer

In a pilot, your team can verify and update venues. Council-confirmed records are marked separately from the AI-assisted baseline, so residents see what has been checked.

A living dataset, not a one-off audit

Records improve over time as venues update information and your team contributes. Far cheaper to maintain than commissioning physical audits of every location.

iNCLUSABLE

How to list your first event.

Quick and straightforward — and your venue profile carries over to every event after it.

1 • Sign up

Download the app, tap "Inclusable Company" and create your council account.

2 • Create your event

Add the name, date, location and a short description of what attendees can expect.

3 • Add accessibility information

Step-free access, accessible bathrooms, seating options, transport and drop-off.

4 • Upload access images (optional)

Photos of entries and facilities help people know what to expect and cut follow-up questions.

The screenshot shows the iNCLUSABLE app interface for creating an event. It includes fields for: Event Banner/Image (with a 'Click here to choose photo' link and '+Add more' button), Event Date (with 'Start date' and 'End date' pickers), Event Time (with 'Start time' and 'End time' pickers), Event Address (with an 'Enter event address' text field), and How to Reach the Destination (with an 'Enter details' text field). At the bottom, there is a dashed 'Add Ticket' button and a solid 'Submit' button.

\$0

Free events pay no fees at all

No listing fee. No ticketing fee. No processing fee.

2.5% + \$0.50

Only if you sell tickets

Per ticket sold, plus processing. Stripe settles securely to council.

iNCLUSABLE

<> EMBEDDABLE DIRECTORY

Your data, on your website.

A pilot includes a lightweight, read-only accessibility directory you can embed on your council's Access & Inclusion page — residents search by postcode and view scored venues, right within your site. It carries a small "Powered by Includable" credit and is built to meet **WCAG accessibility standards**.

```
<iframe
  src="https://www.includable.com.au/embed/council?postcode=2300"
  width="100%" height="620" loading="lazy"
  title="Accessible venues directory"></iframe>
```

Live example — try the embeddable directory for postcode 2300 at [includable.com.au](https://www.includable.com.au).

What the embed includes

- ✓ Postcode search across every scored venue in your LGA
- ✓ Read-only — nothing on your site can be edited by the public
- ✓ Built to WCAG standards, so it doesn't undermine your own compliance
- ✓ One line of HTML — no plugin, no procurement, no ongoing maintenance

iNCLUSABLE

LICENSING

Sized to fit your procurement threshold.

Indicative annual licensing, excluding GST. Every licence starts with a **no-cost pilot** for your LGA. Listing events remains free — licensing covers access to the underlying dataset.

REGIONAL

from

\$5,000/yr

Population under 50,000

- ✓ LGA data extract
- ✓ Quarterly updates
- ✓ Accessibility summary

MID-SIZE

from

\$12,500/yr

Population 50k–150k

- ✓ Embeddable directory
- ✓ Scheduled data access
- ✓ Monthly reporting

LARGE METRO

from

\$20,000/yr

Population over 150,000

- ✓ API access
- ✓ Advanced analytics
- ✓ Access & inclusion reporting support

<> API & DATA PARTNERSHIPS

Ingest the entire dataset.

For platforms, state agencies, tourism bodies, booking engines and mapping providers who need national coverage rather than a single LGA — the full accessibility dataset delivered by API or scheduled bulk sync, under commercial licence terms.

42,000+ venues

300,000+ data points

Every state & territory

PROCUREMENT

Why councils trust Includable.

The questions procurement asks first — answered before you have to ask them.

AUSTRALIAN OWNED?

Yes — wholly Australian owned and operated.

Includable Pty Ltd, registered and operating in New South Wales.

DATA STORED IN AUSTRALIA?

Yes — hosted onshore, in Australia.

Built, maintained and hosted in Australia. Nothing leaves the country.

WCAG COMPLIANT?

Built to WCAG accessibility standards.

Including the embeddable directory — so it won't undermine your own site's compliance.

PRIVACY?

We licence venue data, not personal data.

The dataset describes places and their access features. It contains no resident information.

SUPPORT?

24/7 support, Australian based.

Reachable around the clock, not just in business hours.

LOCK-IN?

None. No exclusivity, no long-term contract.

Annual licence, and every engagement starts with a no-cost pilot.

Detailed security, privacy and data-handling documentation available on request.

iNCLUSABLE

THE DATASET

**42,000+ Australian venues —
every one accessibility-scored.**

A national dataset already built, maintained and hosted in Australia — the same data behind your LGA preview.

42,000+

venues indexed across
every state & territory

300,000+

accessibility data points
captured

Australian

built, maintained & hosted
onshore

**See exactly what we know
about your council area.**

Book a 15-minute demonstration and we'll walk through a live map of the accessible venues already scored within your specific LGA — and how a no-cost pilot would work.
